Introduction

Thanks for using Sidify Apple Music Converter for Windows!

[Sidify Apple Music Converter for Windows](#) is an useful all-in-one iTunes DRM Audio Converter that enables you to remove the DRM protection from **Apple Music tracks**, **iTunes M4P music** and **iTunes/ Audible Audiobooks**, in order to enjoy them offline at any time. Now, it supports converting iTunes music to MP3, M4A, FLAC or WAV format at up to 10X speed. More importantly, this powerful DRM removal tool can also retain Artwork and Metadata (title, artist, album, year, track number and genre).

With its modern-looking and intuitive interface, users can easily handle Sidify Apple Music Converter for Windows at the first sight. This software is embedded with almost all the required features that you will look forward to in a high quality audio converter.

Key Features

- Remove DRM from Apple Music, iTunes M4P Music & Audiobooks;
- Convert DRM-ed iTunes music to MP3/AAC/FLAC/WAV format;
- Convert music at up to 10X faster speed;
- Support batch conversion; Keep ID3 Tags;
- Support 28 languages and more;
- Fully compatible with the latest version of iTunes;
- Support the latest Windows 10.

System Requirements

- Windows XP, Vista or Windows 7, 8, 10;
- 1GHz processor or above;
- 512 megabytes (MB) or higher of RAM;
- 1GB of available hard-disk space or higher;
- iTunes 10 or higher (latest version of iTunes is highly recommended).

- [Check Conversion History](#)

Import Music Files

Step 1: Click "+" button at the top left of Sidify interface, then the adding window would pop up.

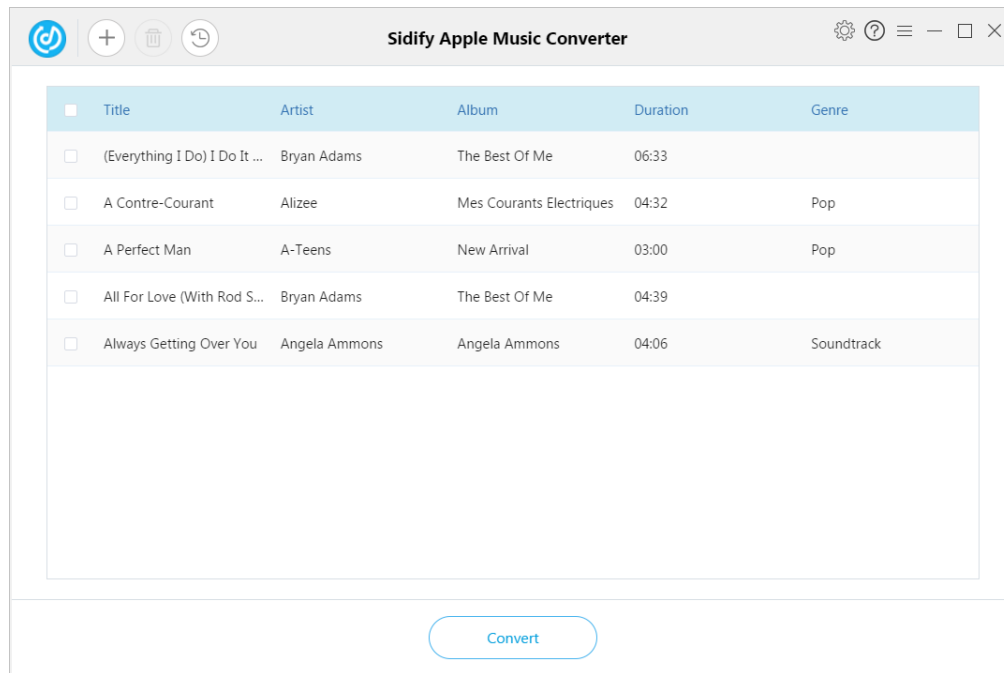

Step 2: Select the files you want to add. Click the **OK** button, then you can see all the files you chose are shown in the file list.

Tips: Sidify also supports batch adding music by pressing "**Ctrl+A**", "**Shift**" or "**Ctrl**" on your keyboard, so that you can convert multiple tracks at one time.

Delete Music Files

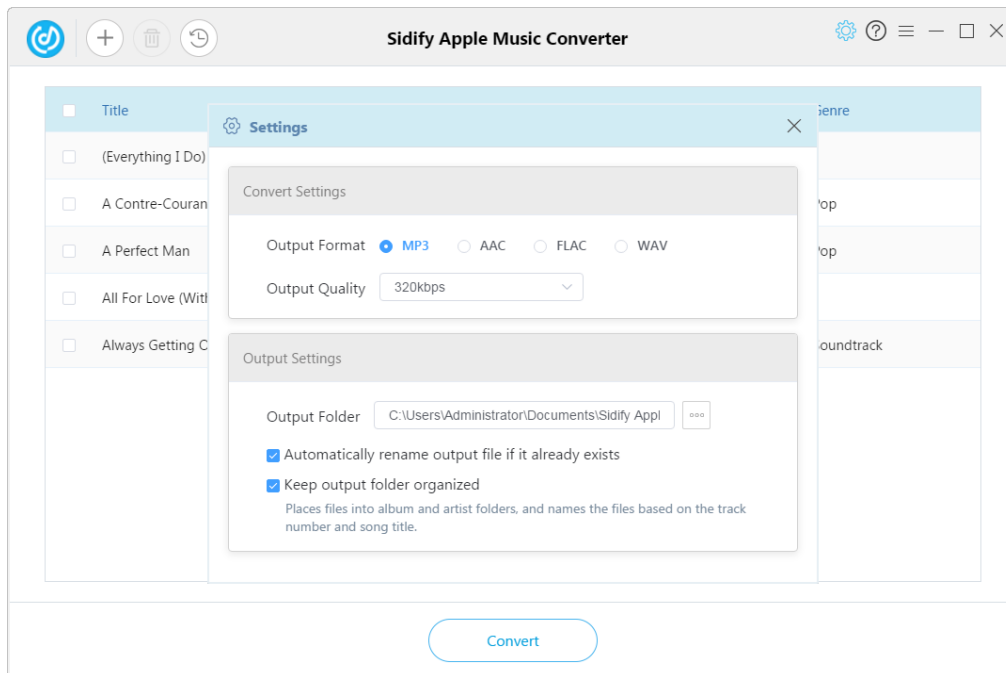

Select the files you want to delete if needed firstly. Then Click the  button to delete.

Choose Output Settings

After importing music to Sidify, you can click setting button to choose output format (MP3, AAC, FLAC or WAV), output quality (320kbps, 256kbps, 192kbps, 128kbps). Finally, click OK to apply.

Customize Output Path

In this setting window, you can click **Browse** button to customize the output directory as required. If you needn't to change the output path, the converted files will be saved under the default folder. And when checking the box of “**Keep output folder organized**”, all the music files will be stored under Artist / Album folder.

Convert Music Files

Once everything is ready, just click the **Convert** button to start converting.

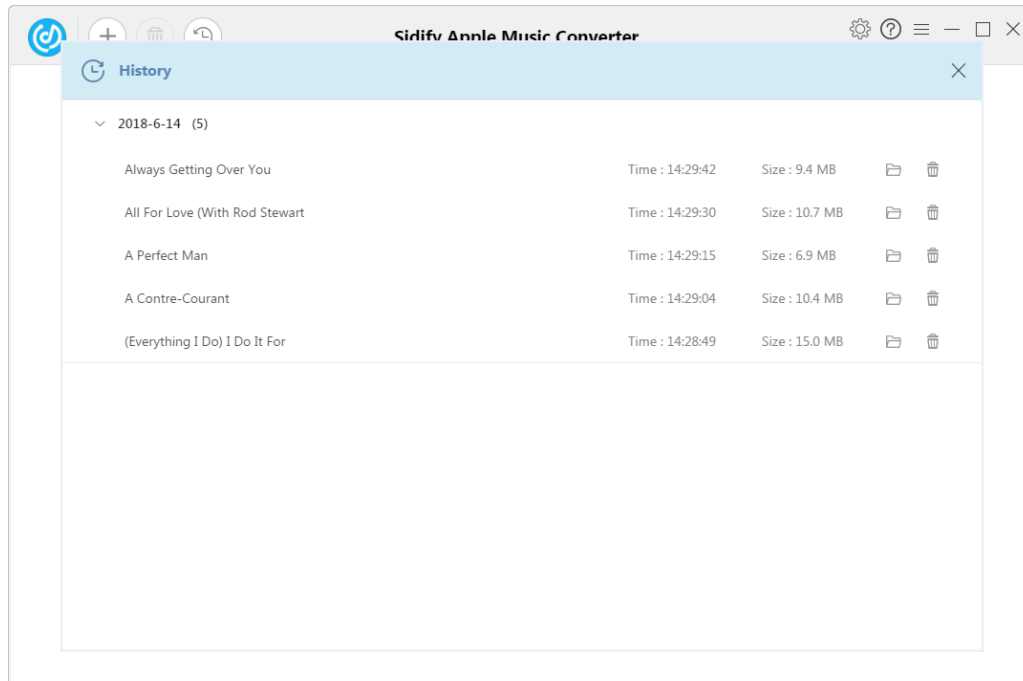

If you're a new user of Sidify program who haven't registered Sidify, you'll see a prompt message as below after clicking **Convert** button. But if you have registered Sidify, this window won't pop up.

Check Conversion History

When the conversion is done, you can also find the converted audio files by clicking  button.
